## SQL Injections

To obtain a list of all users on the site, we utilise the product search page which lists all rows of the returned SQL table. To include the users in the query, which usually is limited to the 'Products' table, we enter the search term as seen in listing 1.

```
1 Nonmatching string')) UNION SELECT *, NULL, NULL, NULL FROM Users --|
```

Listing 1: Search term to get all users in the database
